Edemhope, 10th January, 1867. Mesers. Hood and Co. Dear Sirs.-My hair for some time path has been very thin and weak, falling out in large quantities, leaving me almost bald on the top. I tried many composing to restore it, such as "Tricopherons." do, without producing the least good effect. Seeing ad-vertisements of the Black Oside of Copper, I was in-duced to try it. After using the powder for aix weeks, I find not only is my hair much strengthened, but a new crop has made its appearance wherever the powder has been applied, and I have no donbib but that in a short time I shall pomess astrong head of hair. I can recommend it with confidence to all who are similarly situated. I remain, dear Sirs, yours truly. CHARLES HIME. Esq., Queenseliff. DR. DE. CHURCHILL'S SPECIFIC REMEDIES for CONSUMPTION, Diamine of the Check, Deficient Nutrities, General Defility, Chronic Congh, és. — The special attention of the medical profession and the public generally is easilist to the importance of the fact, thus while many im-tations of Dr. Churchill's invaluable remedies are onn-stative offered for sale, those only are genuine which bear the name of H. H. Swane, pharmacien, Paria, and that accompanying each bottle is the deelaration of Dr. Churchill that none are recognized or resom-mendied by him but such as are prepared, according to is directionals of many eminent physicians, and results of its use in the Strome Hospital for Con-sumption, are enclosed with each bottle, and serve out to place more fully before, patients the right prepared medicines, as in many case disappointments in a rise. from imprare and unakilluly propared initions. THE PHARMACOPCEIA, Second Edition (p. 188) of the Translation of the Pharmacopesis of the Royal College of Physicians of London, by Dr. G. P. Collisr, published by Longman and Co. .--''It is no small defect in this compilation (speaking of the Pharmacopesia) that we have no pur-gative mass but what contains aloss; yet we know that hemorrhoidal persons cannot bear aloss, except it be in the form of COCKLE'S PILLS,

C O C K L E 'S P I L L S, which chiefly consist of alces, scanmony, and colocynth, which I think are formed into a sort of compound extract, the acidity of which is obviated, I suspect, by an alkaline process, and by a fourth in-gredient (unknown to me), of an aromatic tonic nature, I think no better and no worse of it for its being a patent medicine. I hock at it as an article of com-merce and domentic convenience, and do not besitate to any ft is the best made pill in the kingdom; a muscular purps, a mucous purge, and a bydrogogue purges combined, and their effects properly controlled by a dirigent and corrigent. That is does not com-monly produce hemorrhoids, like most alcetic pills, I attribute to its being theroughly soluble, so that no undissolved particles adhere to the mucous mem-brane."

BITTERS. Man wants a Tonio--no uncommon want--And every year and month brings forth a new one Which, after cramming the gazottos with cant, The age discovers to be not the true one. Of such as these let their concoctors want, Th aing the Bitters that have credit due woo--The world's great tonic, which no skill can bettee--I mean the matchless Bitters of Hostetter. Doctors ware living long before old Galen, And since, exceeding learned, grave and age ; But the stomachies they were bound to fail in. Success came not until this latter age. Now is the era sick folks are made hale in, And drand dynepesis driven from the stage, Area dynepsis driven from the stage. Agese, remittant, bendsches--real had-splitters.-Vanish like smoke before Hostetter's Bitters. Vanish like smoke before Hostetter's Initiens. Herics, harks, and roots compose the rare infusion, No minoral poison mare their juices pure. And Bye's mild essence bolds them in solution, The taste is pleasant, the effect is arre. Ne'er have the Bitters yet proved a delusion, Try them in time, and health and strength secure, The dragon-slayer figures on the label, And they, like him, to save the wack are able.
